

Quiz Review

Here are some review suggestions:

Rule-Based Systems

- Know the difference between and be able to explain forward and backward chaining.
- Be aware of how different rule based systems work and how they can be used.
- Be able to draw conclusions from a set of facts and rules.

Neural Networks

- Know how many values a neuron can produce at one time.
- Know how many arguments a neuron can have at one time.
- Know how many layers an MLP neural network can have.
- Understand how a neuron actually learns.
- Be aware of how data travels through the network from input to output.
- Understand the steps required to train a neural network using a training set.
