For this project, you will choose either the Ms. Pac-Man project or the Robocode project. Either will count for your grade on this project. Follow the directions given in the documents for the project that you choose. Both of them are written in Java, so you will need to download a few things first.

First, download and install the IntelliJ IDEA Community edition. You can find it at the following link:
https://www.jetbrains.com/idea/download/#section=windows

You will also need the Java SE Development Kit 8 (also referred to as the JDK). Make use you are getting one of the builds of the JDK 8, and not JDK 10 or 11:
https://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html

Once you have both of these, double-click on your chosen projects .iml file and tell it to launch with IntelliJ IDEA. This should open up the project and you will be ready to work!
